Hi Gina,

The GMAP report for the two AK Steel campaigns won't be finalized until, at the earliest, the week of July 16th. Bilal needs to validate the data and he is on travel for a Technical System Audit next week. In the meantime, Marta is reaching out to others using the DUVAS data to determine how to best approach or caveat the benzene measurements that do not align with the canister sample values.

Michael,

See attached FOIA request from AK Steel for the inspection report and monitoring report/data. Do you have a general idea of when the May 8th monitoring report will be completed?

Thanks,

Gina

Good evening,

I am sending you this email because I received the attached request asking for inspection reports for inspections conducted on May 8, May 23 and May 24, I see that these reports are not completed, I will send a No records report with instructions to resubmit their request, do you know when these reports will be completed?
